CHOICE IRISES

GROWN AT

Sunnyside Gardens

NATICK, MASS. TELEPHONE 1559-J

SUNNYSIDE GARDENS

Are located on both sides of Harvard Street Extension, and No. 3 Sawin Street (residence). Take North Avenue, at North Main Street, and turn left into Sawin Street. Visitors are welcome any day in the week. I grow more than 500 varieties of the best modern kinds, including a great many of the recent novelties of merit, and several thousand seedlings of my own raising.

IMPORTANT—Make Post Office orders and checks payable to SUNNYSIDE GARDENS.

POSTAGE

Postage will be paid on all orders amounting to \$2.00 or more, except as otherwise noted. Orders for less than \$1.00 are not accepted. 10% discount allowed on orders amounting to \$25 or more. We begin shipping the middle of July and up to the first of September. To Southern States and the West Coast until late October.

SUBSTITUTES

Late orders should include a list of substitutes in case some varieties are sold out. Otherwise your money will be returned for varieties out of stock.

SHIPPING

None but fully matured and blooming-size roots, properly dried out before packing, are sent out. Fresh dug roots, packed too soon after digging, are liable to sweat in transit, if the weather is, hot, especially if they are packed in a tightly-closed box with no ventilation. The rhizome then becomes soft, followed by rot, soon after planting. (Holes are always punched in the box to give free circulation of air). Always examine the rhizomes soon as received, and if they are not firm and hard return at once to the dealer you purchased them from.

JOIN THE AMERICAN IRIS SOCIETY

You will receive four Bulletins each year, chock full of Iris interest, all for \$3.00. Send your remittance to B. Y. Morrison, 821 Washington Loan and Trust Co. Building, Washington, D. C.

BRONZE MEDAL

The Bronze Medal of the Massachusetts Horticultural Society was presented to L. Merton Gage, for his Sunnyside Gardens Collection of Irises, in Boston, June 8th, 1932.

CULTURAL DIRECTIONS

Tall bearded Iris should never be planted in a location where water settles, and the melting snows of late winter form a coating of ice over the beds. If your garden is in a low place, build up the beds six or eight inches, and be sure that the drainage is adequate to allow water to go down through the soil freely.

Do not plant too deep, but so that the rhizome is just below the surface. Spread out the roots and water the hole. Then draw the earth around the rhizome and firm well, and do not water again unless there is a continued dry spell.

If the soil is heavy and drainage is poor, white (coal) ashes will lighten it, and the clinkers may be placed in the bottom of the bed, about 18 inches down for drainage. Do not use the red ashes if white are obtainable. There is a lime element in the white ashes that is absent in the red, and this seems to be just the right chemical compound that is beneficial to many plants, Irises in particular. Use freely. Well-rotted manure may be safely used, if it does not come in contact with the rhizomes.

There is no fixed rule as to how often Irises should be divided. Varieties that increase rapidly should be divided and reset every third year, some perhaps every second year, but Irises that increase slowly will sometimes do well for five years without being disturbed.

Irises do not bloom well in too shady a location, as they require plenty of sunshine. A southern exposure is best, and do not plant them on the north or west side of a building. When replanting an old bed add a good portion of fresh soil taken from some place in the garden where irises have not grown before. Late planted irises sometimes do not have time to grow good anchorage roots to protect them against spring heaving caused by alternate thawing and freezing, and it is advisable to mound up these plants at the time of planting as is done by hilling up potatoes, or, at least, before the ground freezes. Mulching or covering with boxes is also a good way to give them protection against heaving, but if boxes are used, put a stone or brick under one side to give them ventilation.

BORERS AND ROOT ROT

Borers and root rot seem to be the important things that one has to contend with. I find that eternal vigilance will keep them both in check. Watch the foliage, beginning the first of July, or earlier in some sections, and where you see a leaf that looks slimy or the edges notched, look out for borers, and get an old glove and squeeze the leaf up and down between thumb and finger.

To check root rot, cut out rotted part and rub wound with Calogreen.

If you raise seeds of Iris, you will know that the flowers have to be bagged soon after pollinating, to prevent the verbena fly from stinging their eggs into the new-forming seed pod, where they hatch out little larvae (Maggots), that eat up all of the young seeds. The scars on the pods where they have been stung are plainly discernible, when fully developed, and if scraped with a sharp pen knife and a little Calogreen rubbed into the wound, that will be the finish of Mr. Maggot. It is said that Calogreen is also effective for preventing rot, but for treating seed pods I believe ordinary calomel would be just as effective. This treatment does away with bagging.

TALL BEARDED IRIS

Sunnyside Gardens' Introductions

FOR 1938

ALLUMEUSE—(Gage, 1938). This is the most gorgeous colored iris I have ever selected from my seed beds of many thousands. Its one fault is poor branching, but its glittering and brilliant color blending is so striking that this fault is overlooked when one sees the beauty of the flower itself. The standards are Wisteria Violet (blush) yellow at the base. The falls are semi-flaring, a blending of Pansy Violet (reddish) and Raisin Purple (reddish) with a golden orange beard. The substance is extra heavy with velvety texture. Large flowers of excellent form and free blooming. Strong grower and medium increaser. Midseason. 45 inches. \$10.00

of ROSY WINGS, but the brown tones of Rosy Wings are absent. It is similar to Dauntless, one of its parents, but not as red. It is, however, a much more brilliant garden subject with more vivid carrying quality. It is a robust grower and increases well. Well branched stalk and medium size flowers with heavy substance. Standards Argyle Purple. Falls light Perilla Purple. A near self. Deep yellow beard; a faint fragrance. Midseason. 42 inches...\$5.00

LADY MARION—(Gage, 1938). A rich Pansy Violet self, with bronzy brown haft and bronze beard. Large flowers of good substance. 41 inches\$5.00

SORDELLO—(Gage, 1938). A smooth Deep Olive Buff self with a Pinkish overtone. Medium size flowers of good substance. The standards are arching, cupped. Falls obovate, well rounded, deep yellow at the haft. Style branches Primuline Yellow (deep yellow). Strong, well branched plant and free flowering. Increases rapidly. Slightly fragrant. Late. 34 inches, \$15.00

A Select List of Choice Irises **INCLUDING** Recent Introductions

ABELARD-(H. Sass, 1934). S. Deep Livid
Brown; F. Veronia Purple; well branched; 26
inches
AIRY DREAM—(Stuart, 1932). Clear, cool or-
chid pink in color, this smooth toned, beautifully
formed flower has rare grace and charm35c
AMIGO—(Wmsn., 1934). A very rich neglecta,
suggesting a blue-purple pansy. Light Lavender
Violet to Deep Hyacinth Violet. Narrow, white
margin. H. M., A. I. S., 1936\$5.00
ANNE MARIE CAYEUX—(Cay., 1924). A soft
mauvette self. C. M. 36 inches35c
ASHTORETH—(Beau., 1932). Clear, pale yel-
low, of heavy texture and smooth finish. A
beautiful mass in the garden. 36 inches. H. M.,
A. I. S., 1930
AUBADE—(Con., 1931). A magnificent soft yel-
low, with the falls flushed rose. 31 inches75c
AUTUMN ELF—(Brown, 1931). A dainty and
attractive Iris. S. olive-cream, domed and slight-
ly ruffled. F. are lavender with olive-cream
edge, and are very flaring and ruffled. The
whole flower has a glistening sheen. Not only is it a dependable fall blooming Iris, but often
blooms in July and August if kept moist during
summer. Fragrant50c
AZTEC—(Kirk., 1935). A fine coppery blend,
much like Timagami, but ten days later. Gold-
en-Tan shaded velvety red with coppery tones
at base. 36 inches\$3.00
BEOWULF—(Sch., 1936). A remarkably effec-
tive combination of brown and deep maroon is
this rich and sumptuous beauty. Not tall but
well proportioned and outstanding. 32 inches,
\$6.00
BLACK WINGS—(Kirk). The blackest Iris;
Dominion form; very velvety deep blue purple;
intensely fragrant; midseason; medium height.
A. M., A. I. S., 193350c
BLUE JUNE—(Donahue), (Gage, 1934). A blu-
ish lavender self. A Sensation seedling of Santa
Barbara type, but blooming two weeks earlier
than Sensation. Drooping-flaring falls, golden
beard and very fragrant. 40 inches. H. M., A.
I. S., 1933\$3.00

BLUE MONARCH—(J. Sass, 1933). A large soft	
violet blue self with a satiny sheen. Color ef-	
fect a clear blue. 40 inches\$1.00	
BLUE VELVET—(Loomis, 1929). A clear, vel-	
vety dark blue. 42 inches. A. M35c	
BROWN MAHOGANY—(Williams, 1936). A	
dark and richly colored Iris with standards of	
deep smoky brown and mulbury. The falls are	
mahogany and maroon. A distinct golden	
brown beard adds greatly to the brownish tone	
of the flower. Tall, widely branched stalks. An	
entirely new color\$15.00 BUECHLEY'S GIANT—(Buechley-Gage, 1933).	
BUECHLEY'S GIANT—(Buechley-Gage, 1933)	
This is described as the largest, and best formed	
large Iris yet produced; a very beautiful light	,
blue flower. Stalks are nicely branched500	
BURNING BRONZE—(Ayres, 1934). Deep red	l
with an intense Bronze suffusion. 40 inches.	
A. M., A. I. S., 1936\$4.00 CASENKA—(Storer, 1931). Enormous flowers of)
CASENKA—(Storer, 1931). Enormous flowers of	2
a rich red-purple. S. near Cotinga Purple. F.	
deep Prune Purple. 32 inches\$1.00	
CHEERIO—(Ayres, 1934). S. dull gold with	
bright red flush F. a glowing velvety red, and	ì
brilliant yellow beard. The flowers are well	ì
formed and hold their color well. Plant strong	
and vigorous. "A flame in the garden." 40	
inches. H. M., A. I. S., 1936\$3.50

ethyst self without veining. Flowers are rounded in shape, of silk-like texture, with nicely branched stalk. 30 to 36 inches high....\$5.00

JAMES STORER—(Storer, 1931). S. Aster Purple. F. Pansy Purple. This is a very rich-colored Iris, and reddest of the so-called red-purples. Tall. strong stalks, well-spaced flowers of ples. Tall, strong stalks, well-spaced flowers of large size. Broad foliage. 38 inches....\$10.00 JASMANIA—(Ayres, 1935). Tall, deep yellow of unusual hue. Large flowers jauntily poised on the stalk. The broad, semi-flaring falls are lightly touched pale blue on the haft with a slight touch of lavender blue in the center. 42 inches. H. M., A. I. S., 1936, A. M., 1937.\$25.00 JEAN CAYEUX—(Cayeux). Beautiful blending of havana or coffee brown, with golden glint. Considered one of the very finest Iris ever imported from France. ported from France\$1.75 JEB STUART—(Wash., 1932). Deep, rich brownish red with a slight coppery tone. Deep orange beard. Strong, well branched stems. A. M., A. I. S., 1935. 38 inches.....\$3.50 JERRY—(Lapham, 1934). This is one of the most brilliant red Irises that I have seen. Good size, well-rounded ruby red flowers; firm stalk; well branched. Medium to late. 36 inches...\$1.00 JOYCETTE—(J. Sass, 1932). A remarkable Iris of rich Red tones; pronounced by many the finest Red Iris to date. Excellent form and substance; many flowers on tall, lowly branched stalks. H. M., A. I. S., 1932, A. M., A. I. S., $1936 \dots 1936 \dots 1936$ KALINGA-(Kleinsorge, 1934). Huge cream self, outstanding both as exhibition and garden specimen. Twelve to fifteen flowers to a stalk; finely branched and well placed. 45 inches. A. M., \$10.00 KING JUBA—(H. P. Sass). Large flowered gold and maroon variegata. H. M., A. I. S., 1932.35c KING MIDAS—(Mead, 1929). Golden buff and garnet-brown. Golden orange beard. Very fine. 28 inches35c LADY GAGE—(Gage, 1934). Medium size flowers of good substance. When the flowers open they are flushed delicate lilac-pink, and fade out to pure white the next day. Very free flowering, and increases rapidly. A most satisfactory garden white; midseason. 30 inches.....50c LARGO—(Ash., 1931). Blending of yellow shades, brown and mauve. 36 inches......50c LEGEND—(Ware, 1932). An exceedingly fine Iris. Very close to Cardinal in color, but deeper and richer, and a larger bloom on a stalk nearly

twice as high. 48 inches......50c

LODESTAR—(Hall, 1925). S. lemon chrome; F. velvety claret brown with a lemon chrome border. We know of no other variegata as distinct as this one. 36 inches
LOS ANGELES—(Mohr-Mich., 1927). Giant
white flowers, edged pale blue35c
cold. F. raspberry, blending into a faint edging of burnished gold. Heavy foliage, and enormous flowers of heavy substance and great carrying power. Widely branched, strong stems. 40 inches\$2.00
LUX—(Cayeux, 1931). S. brilliant old gold suf-
fused bright apricot. F. semi-flaring, pucy rose faintly tinged carmine with a golden glint; beard orange yellow; strong branching stems, 3 feet. Certificate of Merit, S. N. H. F50c
MARQUITA—(Cay., 1931). A stunning novelty;
very large flowers of creamy ivory whose falls are so thickly lined ruby red that the color appears solid to the ivory margin. C. M., France, 1931. A. M., A. I. S., 1936. 38 inches\$2.00
MARY GEDDES—(Wash., 1931). S. salmon; F.
same color overlaid with Pompian red. 40 inches\$1.00
MAUD DEMING—(Lapham-Gage, 1937). Strong,
well branched 42-inch stalks. Good plant, large blooms. Arched standards and well-
rounded, broad falls. Good substance and ex-
cellent resistance. Seven to nine very clean,
fresh, non-fading blooms. Standards Light Vinaceous Lilac (reddish). Falls, Schoenfeld's
Purple (very reddish). Mild fragrance\$5.00
MISSOURI—(Grint., 1933). One of the excep-
tionally fine new Blue-Lavenders. The falls are
broad and flaring, velvety in texture. Substance
of the flower is unusually good, and it is a profuse bloomer. 44 inches. H. M., A. I. S., 1933;
A. M., A. I. S., 1935, Dykes Medal, 1937\$3.00
MONOMOY—(McKee-Gage, 1936). A large, very
Deep Blue Violet with rich, velvety falls semi-
flaring. Deep Blue beard. Hardy and profuse bloomer. H. M., A. I. S., 1934\$3.50
MOTIF—(Sturt., 1931). A red-purple of deep
velvety substance; more brilliant than Pioneer;
splendid Iris. 38 inches50c
MUSSOLINI—(Dykes, 1932). Giant deep blue-
purple. Falls rather heavily veined with white.
Standards a little lighter. Tall, erect and well branched. Silver Medal, R. H. S., England,
1932\$10.00
NATIVIDAD—(M. M., 1932). A warm-toned
white, almost creamy; delightfully lighted by the clear Yellow of the beard and center. 36 inches\$1.00
NEON-(Salb., 1934). S. Bronzy Gold; falls vel-
vety Carmine. "Makes other variegatas look
pale and wan." 48 inches. H. M., A. I. S., 1936. \$2.50

NORMA GAGE—(Gage, 1933). A lovely little
pink and white intermediate with medium size
flowers of good substance and fine texture.
Very free flowering. Quite distinct from other
pink and white Irises. Midseason50c
NO-WE-TA-(H. Sass, 1932), (M. 32). A
true pink self with yellow flushes in the center
and on the edges of standards and falls. A
pinker Midgard50c
ORIANA—(H. P. Sass, 1933). A beautiful, clear
crystal white of splendid form and substance;
large flowers on well branched stem. This is
much superior to the older whites. H. M., A.
I. S., 1933\$1.00
OZARK-(Storer, 1936). S. pompeian red deep-
ening to deep purplish vinaceous in center. S.
Dishar's Dumle Unions solven effect Coast
Bishop's Purple. Unique salmon effect. Great carrying power. Floriferous. Evenly branched
carrying power. Floriferous. Evenly branched
42 inches\$10.00
OZONE—(J. Sass, 1935). A smooth, even-toned
Lavender-Violet with a beautiful pink sheen.
A signal patch of reddish brown at the haft is
most unusual and attractive. Good substance
and well branched. 38 inches\$5.00
·
PAULETTE—(Mur., 1930). A tall, fine, light
blue with large, well-formed flowers of pleasant
even tone. Classical in form and carriage. 40
inches50c
DEACHES (II Some 1020) I amon flowers of
PEACHES—(H. Sass, 1932). Large flowers of
peach, apricot and orange tones. 36 inches,
35c
35c PERSIA—(Ayres, 1929). S. taupe or smoky helio-

YVONNE PELLETIER—Pale blue; tall
YELLOW MOON—Soft, uniform yellow
ZAHAROON—Blend of fawn, violet and rose

IRIS SIBIRICA

These dainty and fairy-like Irises are very hardy and bloom in profusion in partial shade or in the sun, but prefer a moist location, and a fairly rich soil. The flowers are of medium size on tall,

graceful stems. Do not plant Siberian Irises in dry or sloping ground. They like moist, but not too wet soil, and should be planted a little deeper than tall bearded Irises; the crowns ¾ inches below surface, and should be watered occasionally during a dry spell. BLUE CHARM—(Sass, 1931). Large, intense white styles this class. 42 inches. H. M., A. I. S., 1933.\$1.00 GRAMINEA—(Spuria). Odor of ripe apricots; charming for flower arrangement.......75c KINGFISHER—Large, dark blue flowers on stems SNOWCREST—(Gage, 1932). Sib. This is similar in color to Snow Queen, of which it is a seedling, inches but it is taller and freer flowering. Height 38 TRUE BLUE—A little darker standards than Perry's Blue. 24 inches. Good for rock gardens. 35c Siberian Irises and species shipped in Spring and April and September preferred.
